Optional Equipment:

- Direction of view into the room
- Individual color choice

The perfect starter tub for professional care

Bathing relaxes body and soul - especially if you have to live with a physical limitation. Taking away the fear of a nursing tub for those in need of care was the incentive for the development of the LENA 100 lifting bathtub. The needs of the user and the caregiver were implemented in the construction and design of the tub.

Professional technology and the appearance of a bathtub "like home", contribute to a harmonious environment in the care bathroom.

A solid and trouble-free technology, as well as the simplest handling are the guarantor for safe and cost-effective work.
