HSE – Semi-automatic Door Function

The Genius series bedpan flushers are used for cleaning and disinfecting bedpans, urine bottles and stool buckets.

In an environmentally friendly way, an absolutely reliable thermal disinfection process cleans and disinfects the care utensils.

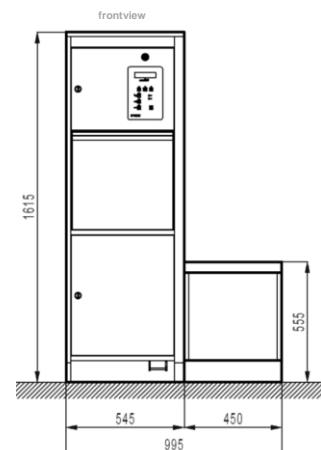

The Genius BP 100 HSE bedpan washer combines the optimum combination of maximum wash ware capacity and installation dimensions. A decision can be made between a 230V or 400V power supply - depending on local conditions.

Three cleaning and rinsing programs are available to the user via a large and clearly arranged membrane keypad:

- The **short program** for liquid soiling, with reduced water consumption.
- The **normal program** for soiling bedpans and chair pans.
- The **intensive program** for heavily soiled bedpans.

Your benefits at a glance

- LCD display, 2 lines
- Door operation: Door opening by foot control
- Deep drawn rinsing chamber made of stainless steel
- Rotating and fixed nozzles guarantee efficient water distribution without rinsing shadows on the wash ware
- Capacity: 1 bedpan and 1 urine bottle or 3 urine bottles
- As floor standing, wall hung or wall mounted unit
- H-Tronic control
- 6 rinse programs, SHORT / NORMAL / INTENSIVE + 3 additional individually programmable programs
- Wash ware holder system
- Soft-Stop door relief - the special damping mechanism prevents the rinsing chamber door from "falling down".
- **Optional equipment:**
- Fan drying with sterile air filter
- Additional dosing pump for intensive cleaner
- Rim rinsing for sink
- Extensive accessories: base cabinets, shelves, wall cabinets, storage combinations, etc.

Technical specifications BP 100 HSE

Width	545 mm

Genius BP 100 HSE

The professional for hygiene and disinfection with semi-automatic door

2 central Multi-jet - main rotating nozzles, 6 Monojet - rotating nozzles, 4 fixed cleaning injectors and an additional nozzle rotating arm ensure optimum rinsing results.

The deep-drawn rinsing chamber made of stainless steel 1.4401 (V4A) without corners and weld seams offers the best self-draining function.

Another example of the innovative Horcher solutions is the Semi or fully automatic door with operation via foot switch. This allows the machine to be operated conveniently without direct manual contact.
